1. **Initial case study on non profit evasive entrepreneurship**
(ex: Greek clinics – maybe supplemented by Iranian case) - Qualitative interviews
2. **Use edgeryders' and opencare's network to collect information on other examples (now unknown to us) on collective intelligence, bazaar type, or evasive entrepreneurship projects (successful and unsuccessful)**
 - Exploratory qualitative interviews ("oral history")
 - Use snowball method to find respondents
3. **Use cases and literature to identify key variables, associated with success, failure, scalability**
4. **Use edgeryders' and opencare's network to collect data on these variables** - Quantitative (survey)
5. **Use other networks to collect additional data on these variables** - Quantitative (survey)
6. **Analyze as a comparative case study**
